REASONS FOR ALLOWANCE

Applicant's response filed 8/17/06 to the Office action has been entered. Claims 16-21, 28-31, 39-41 and 43.

1. The following is an examiner's statement of reasons for allowance:

Concerning claims 16-21, 28-31, 39-41 and 43, no prior art has been found teaching or suggesting the method for separating single stranded nucleic acid from double stranded nucleic acid without using alcohol group in the second liquid.

The closest prior art is the reference of Bastian et al. (6,180,778, issued January 30, 2001). Bastian et al. disclose a method for the chromatographic separation of nucleic acid mixtures into their double-stranded and single-stranded nucleic acid fraction by simultaneously absorbing whole nucleic acid to a mineral support (See column 1, lines 7-14). Bastian et al. disclose the variations in the concentration of materials containing alcohol group in a binding solution influenced the binding characteristics of single stranded nucleic acid or double stranded nucleic acid, while the instant invention is to separate single stranded nucleic acid from double stranded nucleic acid without using alcohol group in the second liquid. Thus the instant invention is patentable over the reference of Bastian et al. (6,180,778, issued January 30, 2001).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
